### Educational aims and objectives

Paediatric orthopaedics is traditionally a feared part of the FRCS (Orth) exam, filled as it with complexity and controversy. Many candidates have not had much personal experience in paediatrics, yet are still expected to be able to discuss the core knowledge in detail. But with so many other subspecialties to master, how do you prepare for it, when your time to revise is limited?

Distilling the techniques used in our popular online revision course into just one intensive study day, this new course aims to give you the knowledge you need to tackle paediatric cases with confidence.

### What delegates say about this course

*"Allow me to provide up to date evidence based practice for my patients for assessment, diagnosis and rehab."*

*"Fantastic session, great talk from Mr Kokkinakis."*

*"Really helpful ,collected lot of exam tips and new information"*

# Course programme

Saturday 2 April 2022

07:45	Delegates log into Zoom
07:50	Welcome and introduction
08:00	Spotter session 1

19:15	Spotter session 2 discussion
19:45	Debrief
20:00	Close of day

Podcast

**Come Back When The Leaves Are Green**

by Gavin Spence and Michail Kokkinakis

Using interviews with great teachers, examiners, successful candidates and others, we discuss preparation for the exam, structuring paediatric viva questions logically, the marking scheme and how to score well, how to answer questions about controversial areas of practice, and the common pitfalls to avoid.
