Course convenor:

Mr Sulaiman Alazzawi

Consultant Orthopaedic and Trauma Surgeon
St George's University Hospitals NHS Foundation
Trust

Educational aims and objectives

A two day, consultants led course covering the basic science, clinical assessment, surgical approaches and techniques for primary hip and knee replacements. The course is designed for trainees (ST3 – ST8).

While the course is not designed to be an exam preparation course, all lectures will be themed towards the required knowledge for the FRCS exam. Participants will also have the opportunity to practice performing primary hip and knee replacement in sawbones workshop stations. By the end of the course, participants should have a solid foundation in understanding the principles in primary arthroplasty.

Course programme

14 September 2023

08:30	Registration and refreshments
09:00	Welcome and introduction
09:05	History of total hip replacement
09:20	Biomechanics of THR
09:35	Biomaterial in THR
