Subject: Confirmation of Support – Hariharan Subbiah Ponniah

To whomever it may concern,

I am writing to confirm the endorsement and support of the MSk Lab at Imperial College London for Hariharan Subbiah Ponniah's application. His project focuses on utilizing an AI Radiomics approach to predict successful patient outcomes after Femoroacetabular Impingement (FAI) surgery.

Hariharan exhibits exceptional dedication in his pursuit of a career in Orthopaedics, and has worked with MSkLab consistently for over 3 years. His past contributions to our research endeavours have been recognized through international presentations and peer-reviewed publications. He is a strong collaborator, and this venture between Imperial College and University of Oxford will build his network, and amplify the results of the research.

I am confident that Hariharan will maximise the opportunities afforded by this funding support. He will be a credit to the ORUK but also serve as an exemplary representative for both the MSk Lab and Imperial College.

We are happy to provide infrastructural and logistical support for this project in Summer 2024. Hariharan will be registered with us as an Undergraduate Research Opportunities Program (UROP) student. Should you require any additional information or have further queries, please do not hesitate to contact me.

Sincerely,

Kind regards,

Kathy B. Lewis
